Pedro Emiliano García Oñate

Torreón, Coahuila • linkedin.com/in/emiliano-garciax • +52 866 210 8600 • ashraahx@gmail.com

Web developer with over 3 years of experience in creating scalable and efficient applications using a modern technology stack. Experience in UI/UX design, CRUD system optimization, and database management, with knowledge of technology infrastructure maintenance.

PROFESSIONAL EXPERIENCE

AMISTAD MEXICO   **Torreon, Coahuila**
FullStack Developer   *February 2025 – October 2025*

- I developed a comprehensive supplier management system using React and Laravel 12, including database programming, business logic, and 2FA authentication.
- I designed the system architecture and functional mockups in Figma, ensuring consistency between the technical structure and user experience.
- I created a standalone supplier portal, optimized for usability, scalability, and security, improving management and communication between different areas of the company.

AGENCIA INTERIOR 1X   **Torreon, Coahuila**
FullStack Developer   *July 2024 – Nov 2024*

- Designed and developed interactive and visually appealing interfaces, optimizing the user experience.
- Implemented CRUD systems and data management practices that improved efficiency and scalability.
- Optimized web performance through responsive design and reusable components.
- Developed unified solutions that fostered technical collaboration and reduced development times.

IT SOLUCIONES   **Torreon, Coahuila**
FrontEnd Developer   *August 2023 – July 2024*

- I developed attractive and functional interfaces that improved usability and user experience.
- I implemented interactive designs aligned with modern web development standards.
- I applied best practices and agile methodologies to ensure code quality and meet deadlines.
